Home Performance with ENERGY STAR®

Expert home efficiency improvements
and \$1,200 in rebates

Our Home Performance with ENERGY STAR® program is ideal for homeowners who need to make multiple improvements to their home, such as adding insulation, a new high efficiency furnace or even an ENERGY STAR certified thermostat.

And the cash back rebate makes improvements an even **better value**. The average rebate per home is **\$1,200**.

The Home Performance with ENERGY STAR program in 4 hassle-free steps

STEP 1	STEP 2	STEP 3	STEP 4
<p>Call Xcel Energy at 800-895-4999 to get started</p> <p>If you haven't already had an audit, our agent will explain your options and submit your request. Your audit report will include estimated costs of improvements and the savings you can likely expect.</p>	<p>Choose a participating contractor</p> <p>Have a participating contractor install your recommended improvements.</p>	<p>Call our partner, NEC, to come inspect and verify that the improvements have been installed</p>	<p>NEC will collect your receipts and submit your rebate paperwork to Xcel Energy</p>

Do you qualify?

- You must complete at least three required and two optional improvements.
- You must be a combined residential gas and electric customer of Xcel Energy.
- Rebates are issued after our partner, The Neighborhood Energy Connection (NEC), verifies the improvements were made and were installed correctly. The average rebate per home is \$1,200.

The audit let's you know if you qualify for the Home Performance program, or other Xcel Energy rebate programs. If not, we'll tell you about other Xcel Energy rebate programs that put money in your pocket.

"This audit was worth every penny."

– Home Energy Audit customer, Romy

**Saving energy means saving money.
It starts with a Home Energy Audit.**

We're here to help you make wise use of energy, no matter what your needs, to reduce your energy bills this winter and all year round. That's why we cover most of the of the audit. **We cover 70% of your Home Energy Audit** — you pay only \$60.

When you sign up for an in-home audit, you **receive a comprehensive inspection that covers more than 25 areas**, including:

- Furnace and central air conditioner efficiency
- Furnace safety check, including draft and carbon monoxide testing
- Attic insulation and air leakage
- Water heater and pipes
- Household appliances

An expert auditor answers your questions and gives you a customized plan and a cost/saving analysis.

Trust your home improvements choices to ENERGY STAR.

ENERGY STAR is an international standard for energy efficient consumer products. Energy efficient choices can save families about a third on their energy bills, without sacrificing features, style or comfort. Plus, with the Home Performance with ENERGY STAR program, you have the chance to earn \$1,200* or more in rebates when you implement five or more recommendations from your audit.

Our rebates will help you offset the initial cost of qualifying energy-efficient products. And you'll likely see your investment returning right away through lower energy bills.

You're required to install the three required improvements and choose at least two additional optional improvements from the list at right.

*Your rebate may vary, however, depending upon the improvements made. The more improvements you make, the more rebate dollars you'll receive. You must be a combination electric and natural gas customer to qualify.

Required Energy Conservation Improvements	Rebate*
<input type="checkbox"/> Air Sealing/Weatherstripping	\$60.00
<input type="checkbox"/> Attic Insulation	\$350.00
<input type="checkbox"/> CFLs	\$40.00
